

A Unique Companion for Tablets and Smartphones.

Designed to overcome some of the inherent limitations of tablets and smartphones as primary controllers, the revolutionary iPro.8 delivers instant connectivity and reliable operation seamlessly and inexpensively.

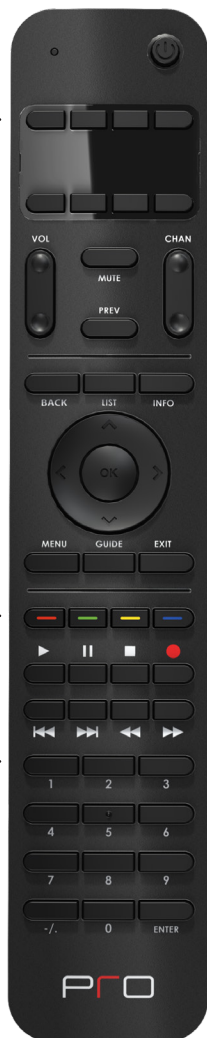

Tablet and smartphone users love finding ways to utilize their devices to streamline their lives, including using them to control electronics and entertainment. Yet the devices are limited by a lack of hard buttons for tactile control, slow connectivity, multiple apps and numerous screen swipes to accomplish simple tasks – not to mention the possibility of the

device being used for another purpose or by someone else. The affordable, patent-pending iPro.8 addresses these issues by working as an extension of the ProPanel App running on a smartphone, tablet or PC. Hard buttons and tactile control provide immediate access to frequent activities such as changing channels, controlling the volume, and DVR transport control. Rather than relying on network connectivity, the iPro.8 communicates instantly via reliable RF technology, and can be used with any Pro Control ProLink processor with an activated ProPanel App.

“Soft buttons” for custom labeling

Color-coded buttons for DVR control

All hard buttons are programmable for tactile control of commonly used functions

SPECIFICATIONS

RF Frequency	433 MHz or 2.4 GHz ZigBee®
Compatible Pro Control processor	ProLink.r or ProLink.z
USB recharging cable	N/A
USB programming	No
Control via infrared (IR)	No
Battery type	4 AAA
Number of commands and macros allowed	Unlimited (Limited only by available memory)
Number of controlled devices	Unlimited (Limited only by available memory)
Wizard-based programming	Yes
Number of programmable hard buttons	50
Dimensions H x W x D	9.45" x 1.83" x .85" (240mm x 46.5mm x 21.6mm)
Warranty	1 year limited
