

Automate the environment.

The Pro.zwi enables affordable control and monitoring of Z-Wave devices such as lights, door locks, shades, thermostats and more from a Pro Control remote or from the ProPanel app.

Home and office automation just got easier with the Pro.zwi Z-Wave Interface. Able to communicate with Z-Wave devices throughout the environment, this powerful module provides two-way control of lighting, thermostats, door locks and more. Leave the home or office knowing that the lights and thermostat are set as you like them, and the doors are locked. You can even monitor these systems remotely via the ProPanel app.

The Pro.zwi greatly simplifies Z-Wave product integration, from programming, to installation, and control. The amazing device provides Z-Wave control entirely within the Pro Control platform, eliminating the need for separate websites or apps, making it easy to take command of the environment.

SPECIFICATIONS

Power	+12VDC, 1A (Power Supply Included) or PoE
RF control	Bi-directional Z-Wave (908MHz)
Integrated antenna	Yes
Communication	Ethernet (LAN)
Ethernet port	10/100 Base-T Ethernet with PoE (Power over Ethernet)
Mounting	Detachable wall bracket (included)
Enclosure	Durable plastic
Indicator lights	Ethernet link, Z-Wave activity, Z-Wave status
Remote/processor compatibility	Pro24.z & ProPanel App/ProLink.z Processor
Z-Wave device compatibility	Most Z-Wave compliant devices
Dimensions H x W x D	6" x 4.4" x 1.0" (152.4mm x 111.7mm x 25.4mm)
Warranty	3 years (parts & labor)
